

KSC Energy Conservation Program

Operations Support Building (OSB) Energy Consumption

- The OSB costs Americans over \$940 per day in electricity costs.
- Federal Mandates require KSC to reduce energy consumption and your Facility Manager needs your help.
- Contact your Facility Manager, Kathy Nelson, (861-3384) if you have energy conservation suggestions.
- Turning off your personal computer, copiers, printers, desk lights, office lighting and fax machines when you go home really add up to savings!
- Your Energy Managers are Ed Brennan (861-4469), Jim Fletcher (264-8432), and Chris Iannello (861-3276).
- You can log on to <http://environmental.ksc.nasa.gov/> for energy tips.

*** Nov. FY 2002 low due to scheduled outages/generator support.
